WE COLOR YOUR WORLD

As Pulver Powder Coatings, we are committed to creating value through superior durability, enhanced appearance and sustainability of our products.

Pulver takes an innovative position in powder coatings, with more than 7 locations on 3 continents. We are supplying to key market sectors like Architectural, Automotive, Appliance, Furniture, Agricultural Machine and General Industry. Pulver Architectural series includes three product series, which are available in qualities tested and approved to major international specifications and quality labels.

Pulver has a range of architectural powder coat finishes that offer 10, 20 and 30 years warranty performance depending on selected powder coating. Pulver Durable (Class 1) is designed to provide Residential projects and will offer a 10 year warranty for building. Pulver Superdurable (Class 2) and Hyperdurable (Class 3) have been designed to provide long term performance warranties for all projects in all locations.

The performance criteria are typically based upon requirements defined in the International Standards. Warranty includes; film integrity (cracking and checking), color and gloss retention, mechanical performance, chemical resistance and corrosion resistance.

The chosen location for Qualicoat powder coating tests, have the highest average exposure to UV, humidity, rainfall and exposure to sea salts.

Features	Pulver Durable	Pulver Superdurable	Pulver Hyperdurable
Type	Standard Durability	Super Durability	Hyper Durability
Specifications	Qualicoat Class 1 GSB Standard	Qualicoat Class 2 GSB Master	Qualicoat Class 3 GSB Premium
Weathering Test Results	1 year real time exterior < 50% Gloss Retention	3 years real time exterior test < 90% Gloss Retention	10 years real time exterior test < %80 Gloss Retention
Products Guarantees	Up to 10 years	Up to 20 years	Up to 30 years
Colors	Ral, Pantone, Ncs, Custom made	Ral, Pantone, Ncs, Custom made	Custom made, Limited colors
Finishes	Glossy, Satin, Matt, Texture	Glossy, Satin, Matt, Texture	Satin, Matt

PULVER DURABLE

Pulver durable is our powder coatings series specifically designed for architectural projects both indoor and outdoor applications. A series of standard durability polyester powder coatings recommended to use in normal weathering environments.

The range has been developed to give both protection and aesthetic finish. This technology comes with a range of guarantees and meets all international and architectural standards including Qualicoat Class 1 and GSB Standard.

That offers significantly gloss retention and resistance to colour change and guaranteed 10 years for indoor and outdoor applications. Matt, glossy, smooth, texture and metallic finishes are suitable.

A wide variety of colors can be chosen such as Ral, Pantone, Ncs and custom made. Those series are recommended for projects located greater than 150 metres from the coast and suitable for residents up to 5 storeys in height, fences, aluminium profile systems, doors–windows, outdoor furniture, lighting, chairs–tables and car parks.

WARRANTY

TURKEY - ISTANBUL

Project: Selçuk Ecza Headquarters, 2013
Architect: Tabanlıoğlu Mimarlık
Product: 09618.MCA53
Coated Material: Aluminum profile systems

NETHERLANDS - AMSTERDAM

Project: World Trade Center, 2020
Architect: PLP Architecture
Product: 09410.P7022
Coated Material: Aluminum profile systems

PULVER SUPERDURABLE

Superdurable is our powder coatings series specifically designed for architectural and construction projects. This technology is ensuring a longer-life for the finish. Superdurable powder coatings series are recommended for all locations where ultra exterior durability is required.

Pulver Super Durable is well suited to withstand harsh levels of UV radiation, inconsistent degrees of humidity, temperature variations and other severe weather conditions that designed to meet the higher weathering requirements. That offers significantly higher gloss retention and resistance to colour change than standard durability powders. The products come with a range of guarantees and meet all international and architectural standards approved by Qualicoat Class 2 and GSB Master. The series comes with 20 years of exterior durability.

A wide variety of colors can be chosen such as Ral, Pantone, Ncs and custom made. Matt, glossy, smooth, texture and metallic finishes are suitable. They are generally used for buildings more than 5 storeys in height, aluminium profile systems, doors-windows, curtain walls.

WARRANTY

TURKEY - ISTANBUL

Project: Istanbul Airport, 2019
Architect: Nordic Office of Architecture
Product: 09030.P7021, 09630.P9006, 09030.P7043
Coated Material: Aluminum profile systems

GERMANY - DUSSELDORF

Project: Mizal Project, 2021
Architect: Eller+Eller Architekten
Product: 08610.PHE14
Coated Material: Aluminum profile systems

PULVER HYPERDURABLE

A series of high performance hyperdurable architectural contains fluoro polymer based polyester powder coatings recommended for all locations where ultra exterior durability is required. They are especially designed for extreme weathering conditions and are used in height, aluminium profile systems, doors–windows.

Those series includes 30 years of exterior durability for film integrity plus color retention and are approved by Qualicoat Class 3.

The reason it is preferred compared to other coating types, Pulver Hyperdurable series includes low enviromental impact (VOC free) and provides single layer coating.

Currently, matt and smooth finish custom made colors may be designed.
